## Professional Summary

Software Engineer with 1 year at Turnix developing AI solutions for [Nail IB](#), the world's largest IB resource platform. Implemented AI-powered features including assignment grading systems and natural language processing tools. Skilled in full-stack development, web scraping, and AI integration with leading language model providers.

## Experience

### Turnix

April 2024 – Present

*Software Engineer*

- Developed AI-driven features for **Nail IB**, including **AI grading**, **Natural Language Filters**, and **IA/EE Sample Modules**, enhancing student learning and automation.
- Built a **PDF Builder** for the **Question Bank**, streamlining question paper generation and improving efficiency.
- Designed and optimized **web scraping workflows** to automate data extraction, processing, and content aggregation.
- **Fine-tuned** LLMs for Nail IB, optimizing model performance for education-specific use cases.

### Coding Ninjas

June 2023 – January 2024

*Teaching Assistant*

- Resolved over **1,000+** student queries on Data Structures and Algorithms, maintaining an average rating of **4.77/5**.
- Contributed to refining DSA course materials, improving content accuracy and clarity.

## Technical Skills

|                              |                                                                                                                                                            |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Languages:</b>            | JavaScript, TypeScript, Python, Java, SQL, HTML, CSS                                                                                                       |
| <b>AI &amp; LLMs:</b>        | OpenAI API, Anthropic API, LangChain, CrewAI, Gemini APIs                                                                                                  |
| <b>Frameworks/Libraries:</b> | Next.js, React, Node.js, Express, Prisma, Redux, Recoil, Firebase, Real-time (Socket.IO, WebRTC, Live Kit), Tailwind, Scss, Framer motion, GSAP, Bootstrap |
| <b>Databases:</b>            | PostgreSQL, MySQL, MongoDB, Redis                                                                                                                          |

## Projects

**WatchMojo** | *Node.js, Express.js, React.js, Tailwind, LiveKit*

[Github](#) | [Live](#)

- Watchmojo is a feature-rich video calling, screen sharing and chatting web application.
- Users can create and join rooms without logging in, allowing instant app usage.
- Integrated Live Kit API for enhanced video calling capabilities, boosting collaboration within the application.

**Duo Studio** | *HTML, CSS, JavaScript, Locomotive JS, Gsap ScrollTrigger*

[Github](#) | [Live](#)

- Inspired by Award winning website Duo Studio.
- Created animations using Gsap, Scrolltrigger and Locomotive scroll libraries.
- Improved performance by optimizing animations that were already on the original website.

**DocSync** | *Node.js, MongoDB, Socket.io, React.js*

[Github](#) | [Live](#)

- Designed and developed an application where users can create and edit documents.
- Multiple users can concurrently edit documents, seeing changes instantly, fostering seamless teamwork.
- Enabled real-time document updates via WebSockets, ensuring users can view edits instantly.

## Education

**GSSDS Khalsa College, Punjab**

July 2020 – May 2023

*Bachelor's of Business Administration in Finance*

CGPA: 7.29

## Trainings

**Coding Ninjas**

January 2023 – November 2024

*Full Stack Web Development*

- [Backend](#) | [Frontend](#) | [Java](#) | [Data Structures & Algorithms](#)
